WEEK 3: ASSIGNMENT 3 SOLUTION

1. An innovator wants to create an app which can help teenagers and young kids to safely use social media. What could be the possible assumptions to be validated in this scenario?

Types of Assumptions-
(a) Need
(b) Technical
(c) Production
(d) Commercial

Assumptions to be validated-
(i) There are sufficient number of parents who are ready to subscribe and pay for such an app.
(ii) There is a demand of an app to monitor and facilitate safe use of social media by teenagers and young kids.
(iii) There is expertise on child psychology and social media operations.
(iv) To have app version for different platforms like android, iOS etc.

Please choose the correct options below:

- a-ii, b-i, c-iii, d-iv
- a-i, b-iv, c-ii, d-iii
- **a-ii, b-iii, c-iv, d-i**
- a-i, b-iii, c-iv, d-ii

2. Statement I: A key component of experimentation in innovation is to get the desired results every time.
   Statement II: For successful validation of all the assumptions of an idea, designing a low-cost experiment is very crucial.
   Which of the following is correct?

a) Only Statement I is correct.
b) Only Statement II is correct.
c) Both the statements are correct.
d) Both the statements are incorrect.

3. The main hinderance in the path of experimentation to validate an innovative idea is:

a) Low-cost experimental setup
b) To keep trying until desired results are achieved
c) The failure fallacy
d) All of the above

4. Role/roles of an idea champion includes:

a) Building support for the new idea or technology
b) Help overcoming resistance
c) Make our idea sticky
d) All of the above

5. Which of the following is not a requirement to make an idea sticky?

a) Concrete
c) Curiosity
b) Concern
d) Credibility

6. Consider a situation faced by a team in an organization to come up with a solution to counter high competition and dropping sales of their product. One of the team members, Ajay comes up with an idea of radicle changes in the product design but is unable to communicate the idea convincingly. Another member Sunil not only believed in Ajay's idea but also tried to help overcome other member's resistance. Finally, the team leader, Jaya having a strong hold in the organization pushed forward the idea and helped implementing the idea by making people accept and work for the idea. Who do you think should be considered an idea champion in this case?

a) Ajay
c) Jaya
b) Sunil
d) All of the above

7. Having a "coding club" in a college would be an example of:

a) Learning environment
c) Community of practice
b) A team activity
d) A group of role models

8. Which of the following could be ways of recognizing the efforts of the employees and encourage them to be innovative?

a) Giving cash incentives to bring in new ideas
b) Putting up employee's photo as "Innovator of the Month"
c) Taking most idea givers on a holiday retreat
d) All of the above

9. Statement I: Japanese organizations differentiate between value added activities and non-value added to become more efficient and create more value.
Statement II: Value creation is at the core of any economic exchange.
Which of the following is correct?

a) Only Statement I is correct.
b) Only Statement II is correct.
c) Both the statements are correct.
d) Both the statements are incorrect.

10. Which of the following statements is correct regarding co-creation?

a) Co-creation is a linear process.
b) Lego creating a platform "Lego Ideas" inviting ideas and suggestions from over 1 million people where fans voted for the most popular ideas, would be an example of co-creation.
c) In co-creation process the burden of value addition lies with the producer.
d) Concept of co-creation is only applicable in service industry.
